Summary

Multidisciplinary professional with an intense passion for software development, backend development, artificial intelligence, and innovations. Experienced in developing digital solutions, creating RESTful APIs, designing databases, working in cross-functional teams, handling technical projects, and delivering customer-oriented applications. Proficient in problem-solving, software engineering, technical writing, team management, and research on AI and machine learning technologies. Passionate about building products that make a difference and continuous learning of emerging technologies. Dedicated to helping organizations grow through a combination of technical knowledge, creative thinking, and effective project management.

Technical Skills

Languages: JavaScript, Python, C, Java, SQL, HTML, CSS
Frameworks & Libraries: React.js, Next.js, Node.js, Django REST Framework, Tailwind CSS, Discord.js
Databases: MySQL, MongoDB
Tools & Platforms: Git, GitHub, Linux (Ubuntu), VS Code, Figma, AWS
AI/ML: Machine Learning, Deep Learning, Computer Vision, Pandas

Internships

Backend Developer Intern

Jan 2026 – Jun 2026

μLearn Foundation (NGO / Social Services)

- Contributed to the design and development of backend services and RESTful APIs for multiple platform modules.
- Gained hands-on experience in scalable application design, database management, and collaborative software development within a cross-functional team.

Projects

Vision-Based Autonomous Surveillance Framework for Traffic Monitoring (UAV)

- Built a real-time UAV traffic surveillance system combining SAHI for small-object detection, BoT-SORT for multi-object tracking, and SIFT homography to compensate for drone movement.
- Designed and implemented the vehicle tracking engine, integrating and fine-tuning BoT-SORT to maintain consistent vehicle IDs across frames in aerial footage.
- Built tracking logic powering trajectory analysis and automated detection of violations such as illegal parking and wrong-way driving, reducing ID switching and tracking failures.

Catalyst IEDC Portfolio Website – Lead Developer

- Led development of the official Catalyst IEDC website showcasing organizational initiatives, events, the startup ecosystem, and the executive committee.
- Designed the website workflow, database schema, and responsive user interfaces; collaborated with a team to deliver a scalable, maintainable platform.

Face Recognition Attendance Monitoring System

- Developed an automated attendance system integrating ESP32 hardware with AWS cloud services for real-time monitoring.
- Designed the face recognition pipeline and ESP32-to-AWS integration, automating attendance capture and improving accuracy over manual methods.

Leadership & Positions of Responsibility

Chief Technical Officer (Software)

Jan 2026 – Present

Catalyst IEDC

- Lead the software team, manage technical projects, and mentor developers across web applications, backend APIs, and internal tools.

Tech Lead

Jan 2026 – Present

μLearn MBCET

- Lead technical initiatives for the chapter, mentoring student developers.

Tech Co-Lead

Mar 2025 – Jan 2026

μLearn MBCET

- Built a Discord bot that automated certificate generation and developed the official μLearn MBCET portfolio website.

Education

B.Tech in Computer Science and Engineering

Mar Baselios College of Engineering and Technology, Kerala, India

Sep 2023 – Present

Higher Secondary Education

CPHSS Kuttikadu, Kadakkal

Mar 2022

Higher Education

CPHSS Kuttikadu, Kadakkal

Mar 2020

Certifications & Achievements

- **Ethical Hacking** – NPTEL (IIT Kharagpur), 12-week certification covering cybersecurity fundamentals, network/web security, and cryptography.
- **AWS Academy Graduate – Generative AI Foundations** – AWS Academy; covered LLMs, prompt engineering, and AWS AI services (Bedrock, SageMaker).
- **Python Fundamentals** – Infosys Springboard.
- **Smart India Hackathon 2024** – Qualified in college-level internal hackathon as part of Team PIXEL.

Interests

Open Source Contribution, Gaming
